### • Switch to Network Environment You Need

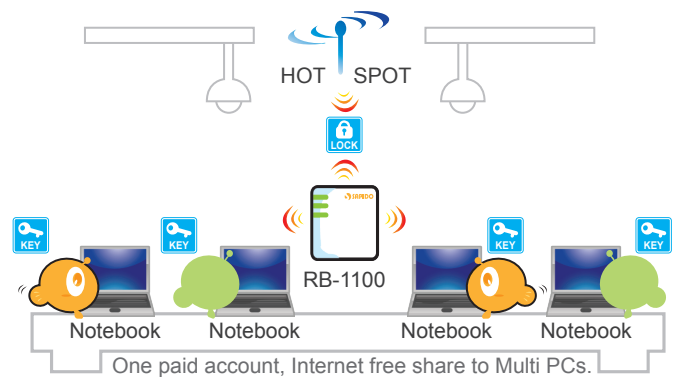

- Router – Share Internet Access Wired/Wireless
- Access Point – Build Private Network or Extend Wireless Coverage
- WiFi ISP – Receiving and Delivering Wireless Signals Wirelessly at the Same Time

### • Internet and Network Security

- Worry about your children might be influenced by porn or violence web pages? Or the employees go to unrelated web sites while working? Unsuitable web pages and web sites could be filtered and blocked by Mini Broadband Router, and only provide peaceful and safety Internet environment.
- Besides, the built-in firewall can protect your internal network from the invader attack. WEP and WPA wireless encryption protect your files and data would not be stolen by unauthorized users.

### • WiFi ISP

- Wireless Signals In & Out
- Connects to ISP modem, hot spot, or AP wired/wirelessly. With DHCP and NAT functions, multi PCs could freely share Internet connection wired or wirelessly through this Mini Broadband Router.

### • DHCP And NAT

- SAPIDO Mini Broadband Router has the features of DHCP Server and NAT. DHCP Server allows you to organize PCs group in local network. And NAT feature can allow many PCs connect to Internet with same ISP account to reach Internet sharing function.

### • System Management

- Administrator can check the network status and maintain the network system via Internet Explore anytime anywhere

### • Name your Own Mini Broadband Router

- It is hard to remember the long IP address, and it is even harder to find your Mini Broadband Router on the Internet if you are using dynamic IP. That is the reason why Mini Broadband Router supports DDNS server feature, which can register a unique domain name for your Mini Broadband Router. Only key in your own domain name, you can connect to your Mini Broadband Router, and no more worry that you can not remember the IP address

### • Advanced Features

- Virtual Server
- Virtual DMZ (Demilitarized Zone)
